DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 6, 2003 has been entered as Paper # 17.

Drawings

2. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 25, 26, and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Anderson et al. (US 5,800,526 A).

As seen in Figures 9, 10, and 12, Anderson et al. disclose an endovascular stent/graft assembly comprising stent means (stent 56 and stent 58) having opposite first and second axial ends, and graft means (graft 52) having first and second axial ends directly contacting first and

Art Unit: 3738

second relatively healthy sections of a blood vessel (graft is bridging an aneurysm). The first axial end of graft 52 is fixedly connected with the second axial end of stent 58 for achieving a substantially end-to-end connection (see figures; see entire document). Said end-to-end connection includes overlapping (see Figures 9, 10, and 12) and the use of an adhesive (see column 11, lines 1-10 and lines 57-60).

Response to Arguments

5. Applicant's arguments filed October 6, 2003 have been fully considered but they are not persuasive.

Applicant argues that Anderson et al. '526 does not disclose an end-to-end connection without overlapping. Examiner respectfully disagrees. Column 11, lines 11-14 disclose: "*At least a portion of stents 56, 58 extend out of graft 52, and if the stents and graft are joined by a butt joint, then substantially all of the stent will extend out of the graft*". Merriam-Webster dictionary defines "butt joint" as "*a joint made by fastening the parts together end-to-end without overlap and often with reinforcement*". Thereby, Anderson et al. '526 still read on the claim language of claims 25, 26, and 3.

Conclusion

6. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action

Art Unit: 3738

after the filing of a request for continued examination and the submission under 37 CFR 1.114.

See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. This application contains claims 4 and 27 drawn to an invention nonelected with traverse in Papers No. 6 and 15. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01. This was addressed in the past office action (Final Rejection: Paper # 16).
